

Lamination of tapes is an ideal process when the objective is to obtain nonstandard designs and widths. The material does not alter its performance and the certification status of the material remains unchanged. The lamination process allows for many different combinations of materials and widths tailored to the need of the customer.

**Categories:** [Laminated Reflective Materials](#), [Reflective Materials](#)

**Class** EN ISO 20471 | EN 469 | EN ISO 11612  
**Product Subtitle**

Flame Retardant Fluorescent Red and Silver

#### ADDITIONAL INFORMATION

**Color**

Fluo. Red/Silver

**Marking**

EN ISO 20471:2013, CE EN 469, EN ISO 11612:2015 A1+A2 B1 C1 F1
